VERIFIERS’ RESPONSIBILITIES

It is our responsibility to express to you an independent opinion on the inventory report presented by the Board of Directors of the Responsible Party. Our verification was undertaken as agreed in the Contract which defines the scope, objectives, criteria and level of assurance of the verification.

BASIS OF OPINION

The subject matter contained in the inventory report is based on historical information for the stated inventory period. Our review was carried out in accordance with the criteria stated in ISO 14064-1:2006.

The verification included examination, on a test basis, of the evidence relevant to the information and data disclosed in the inventory report. It also included assessment of the assumptions and judgements made by the Responsible Party in the preparation of the inventory report.

We conducted our verification in accordance with ISO 14064-3:2006 and the requirements of the Toitū carbon programme Verifier Manual. We planned and performed our verification so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to obtain the specified level of assurance that the inventory report is free from material misstatements, whether caused by error. In forming our opinion we also evaluated the overall adequacy of the presentation of information and data in the inventory report.

Other than in our capacity as an independent verifier of the emissions inventory we have no relationship with or interests in the Responsible Party.
